Light and Water Return for Aboveground Pools  
By Pentair Water Pool and Spa®

## Add brilliant underwater illumination in just minutes

There's no easier or safer way to illuminate your aboveground pool than with AquaLuminator®. It installs in minutes into your pool's existing water return hole to brilliantly illuminate water and make evening swims a more beautiful and satisfying experience. The water return and light fixture are combined in a single, integrated and highly efficient unit. There's no need to cut new holes and risk violating your pool manufacturer's warranty. You'll wonder why you waited so long to add the entrancing glow of underwater lighting to your pool:

- Pentair's advanced, patented hydro-optic technology produces more light with less energy than others—you light your entire pool affordably.
- The energy-efficient halogen quartz light has a rated life of 4,000 hours to deliver maximum value.
- No expensive wiring is required. Just plug into a normal outlet.
- Comes with two color lenses to create just the right mood for your evening swims.
- Adding AquaLuminator to your pool is truly "Plug 'n Play". You get the brilliance of underwater lighting in just minutes, for lasting pool beauty and enjoyment.

# AquaLuminator®

Light and Water Return for Aboveground Pools

Light and return fitting combination provides improved water circulation and illumination in a single fixture

Truly "plug-n-play", AquaLuminator installs in just minutes.

Comes with two color lenses to set different moods for your evening swims.

## Vibrant lighting and enhanced water flow for better cleaning performance

Add the magic of underwater lighting to your aboveground pool.

But why settle for less when AquaLuminator® gives you brilliant underwater illumination and easy plug 'n play installation?

AquaLuminator is the right lighting choice for just about any aboveground pool:
