

Certikin

WINTER Debris Covers

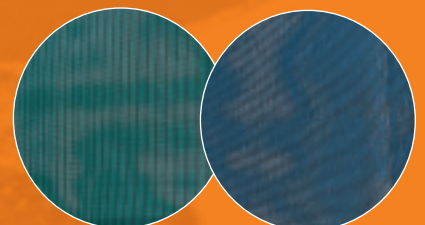

FEATURES

- Highest quality woven polyethylene fabric
- Polished stainless steel spring fixings
- 3 styles of traditional cover to choose from
- Available in a choice of colours
- Cover almost any pool shape and size
- 5 year guarantee

Certikin Winter Debris Covers should form an essential part of the pool winterisation process. Designed to keep the pool clear of leaves and other debris, but allow rain water through, they will also reduce the risk of frost damage. Almost any shape and size of pool can be accommodated, including shaping for roman steps and ladder entry points, - the standard design allows a 0.3m (1') overlap all around the pool. All winter covers are stitched with anti-rot thread and have anti-abrasion strips and pvc reinforcement affixed at potentially high wear areas. Polished stainless steel spring fixings and a storage bag are supplied as standard.

There are three standard winter covers to choose from, the Maple, Criss Cross and Cedar in either blue or green. See the Certikin price list for further details.

ABOVE GROUND POOL WINTER DEBRIS COVERS

Certikin above ground winter covers are ideal for timber pools. Manufactured in a similar way to our classic Maple cover from green or blue woven polyethylene, the above ground cover folds just over the edge of the timber frame and secures with elasticated loops onto stainless steel hooks as opposed to straps and springs. Available for rectangular and hexagonal/octagonal pools of any size, ladder cut outs can also be accommodated.

WALU SAFETY COVER

The Walu Safety cover is a true all-year-round cover and is ideal for use as a winter cover. Each panel of the cover has a series of intergrated drain holes which allow rain water to seap through, but will not allow debris to enter the pool. The anti-abrasion fabric is tough and easy to clean and every cover comes with high wind anchors as standard. Available in two styles to cover almost any pool, the Walu is an excellent winter cover that also provides the peace of mind of being a fully certified (NF P 90-308) safety cover.

Features:

- Manufactured to French NF standard - weight capacity of 100kg (approximately 220lbs)
- Exclusive changeable panel system
- Adjustable, lockable anchor points
- Complete with crank handle - can be operated from either side
- Shaping for steps and ladders available
- Quick and easy to install and operate
- The Walu safety cover can be made from any of the colour choices shown here.
