## Fast and light

After several years research on motor design, we have created a swimming pool robot that is lighter and, more important faster, thanks to a smaller frame and a new transmission system. Following these improvements, we have developed a new venturi-effect system based on 3 jets, which are triangular-mounted to ensure impeccable cleaning quality.

**X3**  
**JETS POWER**

- 3 powerful jets
- Optimised travel
- Automatic reverse travel
- Automatic antilock recoil valve
- Integral bottom and sides coverage
- Greater speed
- Fast, easy installation
- Compact shell
- Extremely light
- Very reliable

Type of system  
**Hydraulic pressure**

Motorisation  
**Booster pump coupled to the filter system**

Suction  
**3-jet venturi system**

Travel  
**Random + automatic reverse**

Litter capture  
**Separate bag + sweep hose**

Guarantee  
**2 years**

For use in  
**All types of pool**

Booster pump power  
**1 hp**

Working pressure  
**1.8 bar**

Suction size  
**6 cm**

Dedicated sweeper socket line  
**16-bar rigid pipes**

Weight  
**2.5 kg**

Speed of travel  
**20 m/min**

Hose length  
**9.60 m**
