

Winteriser Algaecide

5 Litres treats up to 12,000 gallons

What is it?

Lo-Chlor Winteriser Algaecide is a long life copper free algaecide which has been specifically designed to be used through the winter shutdown period.

Who needs it?

- Every pool owner who wants to prevent algae growth in their pool throughout winter.
- Every pool owner who is going on holiday and doesn't want to return to a pool ridden with algae.

What does it do?

- Winteriser Algaecide can be used for eradication and prevention of blue-green, black spot and mustard algae.
- Winteriser Algaecide will prevent occurrence of algae over the winter period.

What advantages does it have over other similar products?

- It need only be used once every 3 months.
- It may be used in all types of pool finishes.
- Compatible with all recognised sanitisers and other pool additives.
- Effective over a wide pH range.

Professional tips:

- For additional winter protection and peace of mind we recommend using Lo-Chlor Starver phosphate remover after superchlorination to ensure that all phosphates have been removed from your pool water prior to adding Winteriser Algaecide, ensuring your winterising product will remain effective for longer.

Use algaecides safely. Always read the label and product information before use.
