

Relax ACTIVE OXYGEN

 **Plastica**

- **Non Chlorine System**

Ideal for swimmers sensitive to chlorine

- **Gentle Action**

Active Oxygen is kinder to the skin – no more dry skin or red eyes. Non bleaching

- **Odourless**

Unpleasant odours completely eliminated.
Active Oxygen has no taste or smell

- **One Treatment per week**

Simple to use, just one treatment each week

- **Compatible with other pool products**

Unlike other non-chlorine sanitisers Active Oxygen is compatible with most products commonly used for pool water treatment. For the ultimate in pool water quality use Active Oxygen in conjunction with the Relax Ultra Violet Steriliser (see separate leaflet).

RELAX ACTIVE OXYGEN

Relax Active Oxygen is a two part system.
Active Oxygen Tablets are used in conjunction with Micro-cide.

RELAX OXYGEN TABLETS

Active Oxygen Tablets are placed in a standard Floating Tablet Dispenser.

One 100gm Oxygen tablet treats 2000 gallons (9000ltrs) of pool water per week. Small Active Oxygen Tablets (10gm) are available for domestic spas. Active Oxygen Tablets need to be added more frequently when used to sanitise spa water.

RELAX MICRO-CIDE

This concentrated micro-biocide has been formulated to discourage the growth of micro-organisms between weekly treatments.

The recommended dosage of Micro-cide is 25ml per 1000 gallons (4500ltrs) of pool water.
